Entry Door Interior Painting

Following are steps to follow when painting the interior of your new six panel front entry door and the surrounding metal door jamb:

1. Choose a high quality 100% acrylic latex paint. We recommend that you read and follow the paint manufacturer's recommendations for application of their paint.
2. Scuff the surface of the door and door jamb using medium grit sandpaper or steel wool to leave a dull finish.
3. Thoroughly clean the surface of the door and door jamb.
4. Avoid applying paint to the weather-stripping.
5. Apply at least one (1) coat of finish paint, following the paint manufacturer's recommendations.
